PROFESSIONAL SUMMARY

Computer Science & Biotechnology student specializing in Machine Learning, Exploratory Data Analysis (EDA), Predictive Analytics, and AI Quality Engineering. Hands-on experience with Python, SQL, Scikit-learn, PyTorch, Pandas, and Power BI. Proven track record in developing machine learning models, structuring ETL data pipelines, fine-tuning LLM response evaluations, and extracting actionable business insights from complex datasets.

TECHNICAL SKILLS & CORE COMPETENCIES

Data Science & ML:	Machine Learning, Exploratory Data Analysis (EDA), Predictive Analytics, Feature Engineering, Classification, Regression, Clustering, Deep Learning (CNNs), Model Evaluation (ROC-AUC, F1-Score, RMSE)
Programming & DBs:	Python (Pandas, NumPy, Scikit-learn, PyTorch, OpenCV, Matplotlib, Seaborn), SQL (MySQL, PostgreSQL), MongoDB, C++
Analytics & BI:	Excel (Advanced Functions, Pivot Tables), Power BI, Tableau, Statistical Modeling, Data Preprocessing & Cleaning
Tools & Platforms:	Jupyter Notebook, Google Colab, GCP (Vertex AI, BigQuery), Git, GitHub, VS Code
AI & LLM Workflows:	Prompt Engineering, RLHF Evaluation, Ground Truth Validation, Data Annotation Quality Audit

WORK EXPERIENCE

Data Science Intern
June 2024 - Present

Averixis Solutions Pvt. Ltd. (Google Cloud Partner)
Indore, India

- Designed and executed end-to-end data preprocessing and cleaning pipelines in Python (Pandas/NumPy), improving dataset quality by 25% across 50,000+ raw data records.
- Built, tuned, and evaluated supervised machine learning models (Random Forest, XGBoost, Logistic Regression) achieving 88%+ accuracy on real-world classification tasks.
- Utilized Google Cloud Platform (GCP BigQuery & Vertex AI) to perform cloud-based querying, automated model training, and metric logging.
- Created interactive exploratory data analysis (EDA) reports and statistical charts using Matplotlib and Seaborn to communicate data insights to key stakeholders.

AI Data & LLM Quality Contributor
Jan 2024 - Present

Outlier AI & OneForma
Remote

- Contributed 30+ hours to RLHF (Reinforcement Learning from Human Feedback) workflows, auditing AI-generated responses for factual accuracy, reasoning, and prompt compliance.
- Curated high-precision ground-truth datasets for computer vision (segmentation, bounding boxes) and NLP classification tasks.
- Evaluated search relevance ratings and audio transcription accuracy, ensuring high data fidelity for machine learning training pipelines.

KEY DATA SCIENCE PROJECTS

AI-Generated Face Detection Classifier
[Python, PyTorch, OpenCV, Scikit-learn]

- Constructed a Deep Learning CNN image classification architecture in PyTorch to detect synthetic (AI-generated) vs. authentic human faces.
- Applied data augmentation, image normalization, and feature extraction via OpenCV, reaching 91.5% classification accuracy and 0.93 ROC-AUC score.

Predictive Churn & Survival Analytics Engine
[Python, Scikit-learn, XGBoost, Feature Engineering]

- Engineered a predictive risk & survival model evaluating customer demographic and behavioral patterns using Random Forest and XGBoost.
- Performed feature scaling, missing value handling, and GridSearchCV hyperparameter optimization, boosting baseline model F1-score by 14%.

E-Commerce Insights & SQL Analytics Dashboard
[SQL (MySQL), Power BI, Excel]

- Developed an automated Power BI dashboard tracking transactional KPIs, customer lifetime value, and monthly revenue trends.
- Wrote complex SQL queries featuring JOINs, CTEs, and aggregation functions to extract clean metrics from multi-table database schemas.

EDUCATION & CERTIFICATIONS

Bachelor of Science in Computer Science & Biotechnology
2024 - 2027

Acropolis Institute of Management Studies and Research, Indore, MP

Certifications: Advanced Data Science & AI/ML Course | Microsoft Excel Specialist | Algorithm & Logic Development
